Leadership: Team Lead (5+ Developers), Code Reviews, Mentorship, Technical Documentation

AI & Automation Tools: N8N, Zapier, Codex, Claude, Cursor, Lovable, Replit

WORK EXPERIENCE

Senior Front-End / WordPress Developer & Project Coordinator | Axora — United Kingdom (Remote)
January 2026 – Present

- Develop and maintain custom WordPress websites and web applications using HTML5, CSS3, JavaScript, and PHP, translating Figma/Adobe XD designs into pixel-perfect, production-ready builds.
- Build fully responsive, cross-browser-compatible interfaces, cutting UI-related bug reports through rigorous QA and fidelity checks.
- Own the full project lifecycle, requirements gathering, scoping, deployment, and post-launch support for all active client engagements.
- Run Core Web Vitals audits and technical SEO improvements, including schema markup and page speed optimization, lifting Google PageSpeed scores and organic search rankings for clients.
- Handle WordPress migrations and VPS/server configuration, maintaining 99.6% uptime across managed hosting environments.
- Lead weekly client milestone meetings and resolve server-side and front-end issues directly, cutting average resolution time by 37% through proactive monitoring.

Senior Front-End / WordPress Developer (Team Lead) | JinnByte — Lahore, Pakistan (On-site)
September 2020 – December 2025 (5 Years 4 Months)

- Led front-end development for enterprise projects delivered by JinnByte for Systems Limited's clients, including Visionet, AtClose, PartnerLinQ, and Evox. Built pixel-perfect WordPress websites from Figma/Adobe XD, developed custom themes, plugins, SVG assets, animations, and ACF-powered components. After three years, when Systems Limited migrated these platforms to Drupal, led the complete front-end rebuild and revamp. Worked closely with Systems Limited and client stakeholders, coordinated project delivery, and mentored a team of developers. Directed the end-to-end redesign and rebuild of Systems Limited's own corporate website, while acting as the primary development contact in client and stakeholder meetings.
- Delivered 40+ responsive, cross-browser websites and web applications across HTML5, CSS3, JavaScript, PHP, WordPress, and Drupal, including custom themes, plugins, and WooCommerce solutions built from scratch using PHP, MySQL, REST APIs, and ACF.

- Mentored and led a team of 5+ front-end developers, lifting sprint velocity by 18% through structured task planning and code reviews.
- Improved site performance and SEO across client projects through page speed optimization, schema markup, and Core Web Vitals audits, reaching top-tier scores for enterprise clients.
- Managed hosting infrastructure and migrations across WP Engine, Plesk, cPanel, Hostinger, and Namecheap, and maintained project documentation, requirements, workflows and progress reports via Asana and Trello.

WordPress Developer | Quentara Sols — Lahore, Pakistan (On-site)
September 2018 – September 2020 (2 Years)

- Built and maintained WordPress websites for US-based clients, focusing on WooCommerce storefronts, ACF-driven content, and custom theme development.
- Coordinated directly with clients on requirements and revisions in a fully remote setup, ensuring builds matched approved designs and timelines.

SELECTED PROJECTS

- AtClose**:** Enterprise WordPress platform for real estate closing, delivered by JinnByte for Systems Limited. Developed ACF-managed content, Custom Post Types, REST API integrations, scroll-based animations, downloadable case studies, and later contributed to the WordPress-to-Drupal migration and revamp.
- **Visionet & PartnerLinQ:** Enterprise websites for AI-driven retail and supply chain solutions, delivered by JinnByte for Systems Limited. Built responsive WordPress platforms from Adobe XD designs and later rebuilt them on Drupal during the platform migration and modernization.
- **Evox:** Enterprise WordPress website delivered by JinnByte for Systems Limited, featuring custom UI implementation from Adobe XD, SVG assets, custom plugin development, and later enhanced during the Drupal migration.
- **Systems Limited (Corporate Website):** Led the end-to-end redesign and development of Systems Limited's corporate website, translating Figma designs into a responsive WordPress solution with custom functionality, performance optimization, and scalable architecture.
- **BSS School:** Dynamic educational platform with custom post types for 10+ branches, ACF-managed content, video banners, and animated counters.
- **CandySpoon & Merium Pervaiz:** Full WooCommerce builds from Figma, custom product templates, lightbox, side cart, wishlist, advanced search and complete checkout flows.
- **BSS LAP:** Custom WordPress student selection plugin with mass-email system, automated account creation, and dynamic branch modules.
- **Impresario Studio:** Highly interactive WordPress site with Apple Podcasts API integration, custom audio player, lightbox gallery, and file-upload contact forms.
- **CLC Online Learning:** Figma-to-code responsive static learning platform with user registration, video lectures, and knowledge resource access using HTML/CSS/JS.
- **NeuMed & Teeth & Smile:** Healthcare websites with video banners, before/after sliders, pop-ups, booking forms, and Google Maps integration.
